

# IS IT TIME TO CHANGE YOUR AIR FILTER?

## YOUR AIR, OUR PRIORITY !

To keep your HVAC unit running efficiently and extend its lifespan, it's crucial to regularly check and change the air filters. Inspect the filter every 30 days and replace it every 60 days to prevent the system from overworking. A clean filter ensures proper airflow, reduces strain on the system, and improves indoor air quality. Regular maintenance can help avoid costly repairs and extend the life of your HVAC unit.

- ✓ Cleaner Air
- ✓ 3 Replacement Filters
- ✓ On-site Filter Checks
- ✓ Avoid \$75 fine for dirty filters
- ✓ 10-15% Lower Electric Bill
